SpectraPour Supreme

Safety Playground Surfacing

SpectraPour Supreme safety playground surfacing is the highest quality product on the market, using a higher density, smaller particle size (0.5-1.5 mm Spectra TPV granule) in the top layer with our high quality UV stable aliphatic binder, all over a shock-absorbing rubber base pad.

SpectraPour Supreme is mixed on-site, and may be used to provide ADA access to existing playgrounds, to retrofit existing play areas, or to fill entire new playgrounds with quality rubber surfacing that stays in place during use.

SYSTEM DATA

- 2-layer system – mixed, poured & troweled on-site
 - Base layer of shock-absorbing rubber material
 - Half-inch-thick wearing surface of rubber granules
- Available in 4 standard colors (all TPV colors available as custom colors, with 6-8 week lead-time)
- Create custom shapes and designs
- Porous system may be installed over Type 2 road base, concrete or asphalt surfaces
- Typically used outdoors
- Conforms to requirements of the ADA
- IPEMA Certified
 - ASTM F1292 for head impact protection
 - ASTM F1951 for wheelchair accessibility
- Available for LEED® credits
